- Night vision in close proximity to the camera (white light LEDs)
- 3 wireless cameras and 3 mobile units can be added
- Installation in covered outdoor area (IP55)
- Operated using the bell transformer or batteries
- Ideal for retrofitting in existing buildings

The Eycasa video door unit provides a communication unit including door opener function and integrated video camera for operating in the day or night. The main unit offers you high level of convenience and flexibility and can be extended with wireless components.

Security & convenience in one package: communication, door opener, video surveillance

With Eycasa you don't just speak to the person at your door and then open it. You see exactly who is at the door and have the option of either speaking or switching the door opener using a main unit or a portable handset (can be ordered separately). The system can be extended by 3 other wireless cameras to secure other entrances (terrace, cellar doors, garage etc.) near the front door.

Main unit: the convenient switching center with no cables

All the data is collected in the main unit: on the 7" touchscreen color display, you can see the video image from the door unit, can communicate and switch the door opener. It is easy to operate by hand – the main unit communicates wirelessly with the door unit and other components without any annoying cables in the living room. The unit works with up to 4 cameras which are all shown on the monitor at the same time. It is suitable for mounting on the wall and on a table.

Video door station: easy installation, good for retrofitting in existing buildings

The door unit can be installed horizontally or vertically. The connections of a previous intercom can also be used. The power supply is connected to the existing bell transformer - or a battery can also be used. Apart from this no

other cables are necessary – the entire system is based on wireless components.

Can be flexibly extended with additional components

The system grows along with your requirements. It can be extended by 3 wireless cameras and 3 portable handsets. Moreover, a family care camera can be integrated as a video baby phone and for monitoring elderly people.
